Links List - Project 1 and 2

CodePen - Hamburger Menu

<https://codepen.io/gl3nn/pen/eHGEF> - This link gave me the appropriate tools in order to properly style my hamburger navigation menu, including code for HTML, CSS, and Javascript.

Google Hosted Libraries

<https://developers.google.com/speed/libraries#jquery> - This link helped to structure the jquery code in order to help with making the hamburger navigation menu properly work on the website.

W3Schools

https://www.w3schools.com/Css/css_margin.asp - This link helped me to remember the structure of margins in CSS and the order in which they go in.

Stack Overflow

<https://stackoverflow.com/questions/7693224/how-do-i-right-align-div-elements> - This link helped me to align several of the div elements in my project to the right.

Markup Validation Service

<https://validator.w3.org/> - This was the website that I used to validate my code, both in HTML and in CSS.

CodePen - Fill Space in a Form

<https://codepen.io/heatherlaude/pen/PVLQMX> - This link helped me to format my contact form correctly and use flex-box and flex-grow to fill the area evenly.

CodePen - Responsive Image Slider

<https://codepen.io/dfitzy/pen/xZqGVo> - This link helped me to plug-in a responsive image slider into my portfolio page using HTML, CSS, and Javascript.

CodePen - Animated Button

<https://codepen.io/zanewesley/pen/yLgPEON> - This link helped me to add an animation to my contact form button using a plug-in containing HTML, CSS, and Javascript.
